Instructions to customer

Installation

Attached to this apparatus is an approval label. This label is evidence that it is a "Permitted Attachment" which has been authorised to be connected to your telephone service.

Conditions relating to connection and operation of this Permitted Attachment are contained in Telecommunications General By-Law 220 (5).

You are authorised to install this Permitted Attachment yourself by plugging it into the line socket of any regular telephone. You may connect it in place of your existing telephone or to any spare telephone socket installed in your premises.

To disconnect your existing telephone you must first remove its plug from the line socket. You can then insert the plug of your Permitted Attachment into the socket and use your equipment.

If the plug of your existing telephone cannot be readily removed, you will have to remove the screw securing it. To do this proceed as follows:

1. Loosen screw "A" sufficiently to remove the socket cover. (See Fig. 1.)
2. Remove screw "B" and withdraw the plug. (See Fig. 2.)
3. Replace screw "B". (See Fig. 3.) Ensure that it screws completely into the socket recess. (If the screw is too long, increase the hole depth or replace the screw with one 5 mm shorter.)
4. Replace socket cover and tighten screw "A". (See Fig. 4.)

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Important Information

If you are satisfied with the operation of your telephone service after plugging in your Permitted Attachment, your installation is completed.

You will be unable to connect this Permitted Attachment if your telephone service consists only of a wall phone or an old style telephone which is not connected by means of a modern plug and socket. In such cases a new socket will need to be installed.

Should the Permitted Attachment not operate when plugged into a socket, it is either faulty or unsuitable for operation with your telephone service. It should be returned to the store where purchased or an Authorised Service Centre.

Service difficulties

If at any time a fault occurs on your telephone service, carry out the following checks before you call for service:

- Disconnect the Permitted Attachment and try using the service with the normal telephone.
- If the telephone service then operates satisfactorily, the fault is in your Permitted Attachment. Leave the Permitted Attachment disconnected and report the fault to its supplier or agent to arrange for repair.
- If when using the telephone the service is still faulty, report the fault to "Service Difficulties and Faults" for attention.

You are required to keep this Permitted Attachment in good working order while it is connected to your telephone service. Its construction or internal circuit must not be modified in any way without permission.

WARNING

This cordless telephone system does not incorporate provision for secrecy of conversations. Appropriately tuned radio equipment and other cordless telephone systems in close proximity may be used by a third party to monitor and possibly interrupt conversations in progress when this system is on radio operation.

Important Information

Only use the power supply included with the product.

Do not connect the AC Adaptor to any AC outlet other than the standard AC230 V. The apparatus is approved for use with PQLV200AL power supply.

This apparatus is unable to make emergency telephone calls under the following conditions:

- The portable handset batteries need recharging, or have failed.
- During a mains power failure.
- When the Key Lock is set to ON.
- When the unit is in Direct Call mode.

Do not open the base unit or handset (other than to change the batteries).

This apparatus should not be used near emergency/intensive care medical equipment and should not be used by people with pacemakers.

Care should be taken that objects do not fall onto, and liquids are not spilled into the unit. Do not subject this unit to excessive smoke, dust, mechanical vibration or shock.

Environment

Do not use this unit near liquid—for example, near a bath tub, washbowl, sink, etc. Damp basements should also be avoided.

The unit should be kept away from heat sources such as heaters, kitchen stoves, etc. It also should not be placed in rooms where the temperature is less than 5 °C or greater than 40 °C.

The AC Adaptor is used as the main disconnect device, ensure that the AC outlet is located/installed near the unit and is accessible.

WARNING:

TO PREVENT THE RISK OF FIRE OR ELECTRICAL SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR ANY TYPE OF MOISTURE. THE CORDLESS HANDSET IS MAGNETISED AND MAY RETAIN SMALL METALLIC OBJECTS.

Battery Caution

Use only specified batteries.

Only use rechargeable batteries.

Do not mix old and new batteries.

Do not dispose of batteries in a fire, they may explode.

Check local waste management codes for special disposal instructions.

Do not open or mutilate the batteries.

Released electrolyte is corrosive and may cause burns or injury to the eyes or skin.

The electrolyte may be toxic if swallowed. Exercise care in handling the batteries in

order not to short the batteries with conductive materials such as rings, bracelets and keys.

The batteries and/or conductor may overheat and cause burns.

Charge the batteries provided in accordance with the information given in this operating guide.

Location

- For maximum distance noise-free operation, place your base unit:
 - Away from electrical appliances such as TV, radio, personal computer or another phone.
 - In a convenient high and central location.

Setting up

◆◆ Connection

Plug in the AC adaptor and the telephone line cord in order **1, 2, 3, 4**.

Fasten the AC adaptor cord to prevent it from being disconnected.

The AC adaptor must remain connected at all times. (It is normal for the adaptor to feel warm during use.)

- Never install telephone wiring during a lightning storm.
- KX-TCD400AL is not designed to be used with rotary (pulse dialling) services.

◆◆ Battery Installation

Please ensure the batteries are inserted as shown. ⊖ part should be inserted first. Close the cover as indicated by the arrow.

- When you replace the batteries, ⊕ part should be removed first.

To replace the battery:

Press the notch on the cover firmly and slide it as indicated by the arrow. Replace 2 batteries and close the cover then charge the handset for about 7 hours.

Battery Charge

At the time of shipment, the batteries are not charged. To charge, place the handset on the base unit. **Please charge the batteries for about 7 hours before initial use.** During charging, the battery icon is as shown below.

Fully charged

During charging

Display icon	Battery strength
	High
	Medium
	Low
	Needs to be charged

The handset which power is off will be turned on automatically when it is placed on the base unit.

In normal use, the handset and the base unit should be powered on at all times.

Battery Life

Battery life is dependent on use and conditions but in general when using fully charged Ni-MH batteries (700 mAh):

Talk time: 10hrs approx.

Standby time: 120hrs approx.

When using Ni-Cd batteries (250 mAh):

Talk time: 4hrs approx.

Standby time: 40hrs approx.

(Times indicated are for peak performance.)

The batteries reach peak performance after several full charge/discharge cycles.

The batteries cannot be overcharged unless they are repeatedly removed and replaced.

If battery life is shortened then please check that battery and charge terminals are clean.

For maximum battery life, it is recommended that the handset not be recharged until battery icon flashes

Before Requesting Help

If you experience any problems with the normal use of your apparatus, you should unplug it from the telephone outlet and connect a known working telephone in its place. If the known working telephone still has problems, then please contact the customer service department of your Network provider.

If it operates correctly, then the problem is likely to be a fault in your apparatus.

In this case, contact your supplier for advice. Your Network provider may charge you if they attend a service call that is not due to apparatus supplied by them.

Turn the power OFF then ON (Handset)/Disconnect then connect the AC adaptor (Base unit).
